1/07 to present, Associate Faculty
MiraCosta College, 1 Barnard Drive, Oceanside, CA 92056
Media Arts Technology/Digital Imaging and Graphic Design — Illustrator & Photoshop Instructor

1/99 to 8/08 Associate Professor
San Diego Community College District, Continuing Education
North City New Media Center, 8401 Aero Drive, San Diego CA 92123
Interactive Media Certificate Program

Responsible for restructuring the IMCP program so that students start with foundational skills and build up to a well-rounded portfolio.

The Interactive Media Certificate Program covered the fundamental elements of effective visual communication using print, multimedia and Web. Students learn how to plan and develop projects from concept and design through production and delivery. Principles of design and composition are implemented throughout the program. Students learn how to integrate color, type and graphics to convey information and make an impression.

Students learn the following major applications: Photoshop, Illustrator, InDesign, Acrobat, Soundtrack, VRWorx, Swift 3D, After Effects/Motion, Final Cut Pro, Flash and Dreamweaver. They also learn many other applications needed to accomplish their projects.

At the end of the program, successful students have a well-rounded portfolio that includes print, multimedia and Web design ready for presentation to potential employers or clients.

Responsible for nurturing many students who have become award winners and successful professionals.
